AI FOR RF

AUTOMATED SPECTRUM SITUATIONAL AWARENESS

SIGNALEYE™

AVAILABLE NOW

SignalEye™ is always on, listening, learning and alerting you to the signals that threaten you and your mission.

The RF spectrum has emerged as a new fighting domain. Peer and near-peer adversaries threaten our dominance on land, air, sea, space and cyber every day.

Use artificial intelligence to make sense of the vast number of signals you're seeing and those you've collected for true situational awareness. Recognize when a threat is coming for you, not when it's at your door. With SignalEye™, you will know what is normal and what is a threat at the speed your mission needs.
