GEM™ X Encryptor Manager
End of Production Announcement

April 13, 2018

General Dynamics is announcing the end of production of the GEM™ X Encryptor Manager Software (including GEM X Lite). GEM X is no longer available for purchase; however General Dynamics will continue to provide Technical Help Desk support and honor all active warranty and maintenance agreements. GEM X Users under active warranty and maintenance agreements will receive the GEM One upgrade at no additional cost.

Replacement Product:

As the next generation of the GEM X software, GEM One is the replacement product/upgrade path for current GEM X users. All GEM X users under active warranty/maintenance are eligible to receive GEM One at no additional charge. To check the status of your warranty/maintenance or to order GEM Encryptor Manager Maintenance, please visit www.gdmissionsystems.com/infosecsupport

GEM One is a robust, easy to use enterprise-level remote encryptor management solution. GEM One enables administrators to visualize and manage a network of dispersed devices - including their health, status and connectivity – from a central location. This provides enterprise-level situational awareness and enhanced management of the ecosystem and all its moving parts. For more information on GEM One product offerings and the enhancements compared to GEM X, please visit www.gdmissionsystems.com/gemone or contact your Infosec Account Manager at 888-897-3148; Infosec@gd-ms.com.
