Overview:
The Fortress 20W eNodeB (RN2420) is a member of the Fortress LTE family of high performance Evolved Node B (eNodeB) base stations. The RN2420 is a Size, Weight and Power (SWaP) optimized LTE base station that houses digital baseband and Radio Frequency (RF) circuits in a compact, environmentally hardened enclosure. The small size of the RN2420 makes it ideal for public safety, tactical cellular and private network deployments worldwide.

What Sets Us Apart:

- **Compact Design** – The RN2420 eNodeB combines digital baseband processing and radio circuits into a compact rugged, water and dust resistant enclosure. The Size Weight and Power (SWaP) optimized design and high performance enable the RN2420 to meet operational requirements using the minimal amount of eNodeB's, reducing system size, setup time and cost.

- **High Performance** – The combination of the high performance and compact size of the RN2420 eNodeB allow it to meet any operational requirement using the minimal amount of eNodeB's.

- **Standards Compliant** – The RN2420 eNodeB complies with the global 3GPP LTE standards to ensure interoperability with 3GPP compliant User Equipment over the LTE air interface protocols. The RN2420 eNodeB implements the standard S1 interface to the Mobility Management Entity and Serving Gateway in a 3GPP Evolved Packet Core.

- **Interference Mitigation** - The RN2420 eNodeB implements sophisticated real-time algorithm to detect and avoid external interference. This agility allows the RN2420 to coexist with other systems or to respond to deliberate interference or jamming attempts.

About General Dynamics Fortress LTE
Ideal for specialized private wireless deployments, Fortress LTE delivers an end-to-end solution providing ‘always on’ high speed network access to vital information including voice, video, data, text and chat using any 3GPP compliant LTE enabled device. Fortress LTE solutions are frequency agile, customizable for specific applications and designed for harsh, permanent or temporary deployments where network access may not be available. Fortress LTE is a cost-effective, single vendor end-to-end solution consisting of:

- 4G Core Network
- Radio Access Network (Base Station)
- User Equipment (UE)
# Fortress® LTE 20W eNodeB (RN2420)

## Specifications

- **RF power output**
  - +43dBm (20W) total (+40dBm (10W) per antenna port)

- **Antenna connector type**
  - Two Tx/Rx 50-ohm 7/16-DIN female
  - Two Rx only 50-ohm N-type female

- **Operating frequency**
  - B3: 1805–1880 MHz DL, 1710–1755 MHz UL
  - B4: 2110–2155 MHz DL, 1710–1755 MHz UL
  - B5: 869–894 MHz DL, 824–849 MHz UL
  - B7: 2620–2690 MHz DL, 2500–2570 MHz UL
  - B12: 729–746 MHz DL, 699–716 MHz UL
  - BC13: 746–756 MHz DL, 777–787 MHz UL
  - B14: 758–768 MHz DL, 788–798 MHz UL
  - B17: 734–746 MHz DL, 704–716 MHz UL
  - B20: 791–821 MHz DL, 832–862 MHz UL
  - B28: 758–803 MHz DL, 703–748 MHz UL
  - B40: 2300–2400 MHz DL/UL
  - B41: 2496–2690 MHz DL/UL
  - Non-standard bands:
    - S-band: 2000 – 2100 MHz DL/UL
    - C-band: 4400 – 5000 MHz DL/UL

- **Bandwidth**
  - 1.4MHz, 3MHz, 5MHz, 10MHz, 15MHz, and 20MHz

- **3GPP compliance**
  - 3GPP release 10 (software upgradeable)

- **Duplex method**
  - TDD/FDD (band dependent)

- **Number of users**
  - 256 concurrently connected sessions

- **Maximum throughput**
  - 140Mbits/s downlink, 51Mbits/s uplink

- **Backhaul interface**
  - RJ45 SFP for copper Ethernet or fiber SFP

- **LMT interface**
  - Serial port connection

- **Power consumption**
  - 180W typical 250W maximum

- **Dimension**
  - 450mm x 170mm x 300mm (18” x 7” x 12”)

- **Weight**
  - 14.5 kg (32 lbs)

- **Voltage**
  - 90 - 264 VAC 50/60Hz or -48V nominal (operating range: -36 VDC to -72 VDC)

- **Operating temperature**
  - -40° to +55° C (-40° to 131° F)

- **Water and dust proof**
  - IP65 (IEC529) and NEMA 4X

- **Safety**
  - EN60950 certified
