## Mission Systems

### EHS GUIDELINES FOR GENERAL DYNAMICS MISSION SYSTEMS

General Dynamics C4S (GDC4S) is an ISO 14000/OHSAS 18000 certified company and as such it is the Environmental, Health, and Safety (EHS) policy to protect employees, customers and the community by:

Minimizing health and safety risks

Reducing environmental impact

Complying with legal and other requirements

Pursuing continual improvement

Contractors working on site or on behalf of GDC4S are required to follow all federal, state, and local requirements governing their activities as well as GDC4S guidelines.

The following is not intended to be inclusive of all safety, environmental, and health regulations, but covers some of the more common requirements for GDC4S work areas. If you have questions about any environmental issues, safety provisions or meanings, you should address them with your employer, your GDC4S contact, or the GDC4S EHS department prior to proceeding with your work.

" Each contractor shall perform work in a manner that will minimize and control the production and spread of noise, dust, and dirt into adjacent areas. Work that cause any undesirable vapors, fumes, and/or emissions must be adequately ventilated.

" All chemicals brought onto GDC4S' property must be properly labeled, in proper containers, stored in approved areas and disposed of in accordance with all federal, state, and local requirements. Further, hazardous materials must have prior GDC4S approval and Material Safety Data Sheets (MSDSs) must be provided to the EHS Department.

" The appropriate personal protective equipment, required for the task to be performed, shall be worn.

" Lock out/tag out procedures shall be followed whenever a machine or a piece of equipment must be serviced. All energy sources and power supplies will be disconnected and locked.

" Confined space entry shall be coordinated through the EHS department and the Project Engineer.

" Any generation of hazardous wastes (solid or liquid) must be coordinated with the EHS Department prior to generating the waste. Storage, labeling, disposal, and handling of hazardous waste must meet state and federal requirements.

Acceptance of this purchase order acknowledges that you have reviewed the above procedures and your willingness to work with GDC4S to make your work tasks at our facilities safe and compliant.
