

URC-300[®] Transceiver

Redefining Software Defined

Supports **VHF** and **UHF** frequency bands

Ideal for grab-and-go, rackmount, vehicular applications

Software-Defined with true **field** upgradeability

Maximized RF Performance

enables close proximity operation as close as **50 ft** vs 50-112 ft. required by typical radios

Smaller and Lighter

than the URC-200, 2 radios can fit side-by-side in a standard rack

Glove-friendly,

intuitive, easy-to-use interface

Ruggedized for Outdoor Environments

SHOCK

VIBRATION

ALTITUDE

HUMIDITY

TEMPERATURE

Compatible with the **URC-200 (V2)** radio and many of its accessories

Certifications Obtained **in Advance** by General Dynamics eliminate purchase, deployment and spectrum approval delays and enables global operation

Improved battery life and additional input power options

Maintainer Web Application enables user to connect and control the radio's interface via a **common web browser**
